

Sterling Aviation

THE STERLING
experience

Aircraft Management • Air Charter

Offering the finest in aircraft management and air charter services.

Sterling Aviation is a privately held, full-service corporate aviation firm specializing in the highest quality management, charter, maintenance, and acquisition support of aircraft for private travel. We have bases in Milwaukee and Naples, Florida, and provide management and charter services worldwide.

Sterling holds certifications as an FAA Part 135 on-demand air carrier and as an FAA Part 145 repair station. We have an accident-free record extending back to our founding nearly 25 years ago and are Gold Rated by ARG/US, the premier safety auditing firm in the corporate and private aviation industry.

The essence of Sterling involves not just responding to but also anticipating client needs – an extraordinary level of detail that has come to be known as The Sterling Experience.

Sterling Charter

The professionals on the Sterling Charter Team are ready, willing and able to match your travel requirements to one of our top-quality jet or turboprop aircraft. A detailed quote will be turned around in a matter of minutes whenever possible. Your trip will be conducted in a private, secure and confidential fashion.

You will have peace of mind, knowing that you will be served by one of our highly experienced FlightSafety trained crews. And, your catering, ground transportation and other special needs will be under the supervision of our Aviation Concierge.

Above and beyond this, you will experience a sense of transparency and care – no one-time inducements, no plastic cards, no hidden fees. All documentation is straightforward and understandable; every cost item is clearly listed. With Sterling, you don't get gimmicks. Instead, you get superior safety and service at prices lower than the national and regional programs.

In-House Maintenance

The factory-trained technicians at Sterling's Maintenance Center at Milwaukee's Mitchell International Airport ensure that each aircraft in our fleet is meticulously maintained to the manufacturer's most stringent standards, and also meets all requirements of our own FAA Approved Aircraft Inspection Program.

Our 24/7 staffed maintenance facility is certified as an FAA Part 145 repair station and is monitored by the Flight Standards District Office located at Mitchell International.

Sterling Management

Sterling Aviation has nearly 25 years of experience managing aircraft in a safe, secure and cost-effective manner. We take pride in our ability to totally manage the ownership process so that our clients can focus on their core businesses. Sterling is able to fully manage or charter manage aircraft at any location throughout the world.

While our management services tend to be based on either a turn-key management or charter-management model, there is no "one size fits all" philosophy at Sterling. In fact, the vast majority of programs are built on a blended platform – individually tailored to unique client needs and travel profiles, while providing the level of charter revenue desired.

Acquisition Support

Sterling Aviation does not exist to sell you an aircraft. Instead, we're here to guide you through the process when you're ready to consider purchase. We'll help you sort out the options. And we'll be sure to explain the frequently surprising economic advantages of full aircraft ownership, especially when compared with fractional ownership programs.

Midwest and Florida Bases

- “ Top quality jet and turboprop fleet
 - “ 24 years accident-free operation
 - “ ARG/US Gold Rated for safety
