

Sterling Aviation Adds Gulfstream G100 to Jet Fleet

G100 Combines Long Range with Exceptional Value

MILWAUKEE, WI (May 3, 2010) – Sterling Aviation, a leading Midwest business and private aviation company headquartered at Milwaukee’s Mitchell International Airport, has expanded its charter fleet with the addition of a Gulfstream G100. The aircraft offers mid-size cabin and performance at near small jet prices.

“When business or personal needs demand non-stop travel to any destination in North America, Central America or the Caribbean, as well as speed and convenience, chartering the G100 with Sterling can help clients maximize efficiency,” said Roger Banaszak, Sterling’s Vice President of Marketing and Sales.

The G100’s neutral interior is appointed with light beige leather and has standard seating for seven passengers including an aft 4-place club arrangement. Additional features include a refreshment center with a coffee brewer and microwave, large stow-away tables, plus a belted lavatory seat.

“We continue to expand the variety of our fleet of managed and charter aircraft in order to better serve our clients,” said Rob Gort, Sterling’s President and Chief Operating Officer. “The G100 offers an exceptional value with its outstanding performance and cabin compared to similarly priced aircraft.”

Sterling Aviation is a full-service business and private aviation firm specializing in aircraft management, air charter, aircraft maintenance and aircraft acquisition, and is an FAA certified Part 145 Repair Station. Sterling’s Part 135 Air Carrier Certificate has nearly 30 years of accident-free operation and is authorized for worldwide operations. The company is Gold Rated by ARG/US, the premier independent auditing firm in the private aviation industry.
