

Sterling Aviation Adds Second Hawker 800XP

Jet Fleet Continues to Grow as Sterling Increases Chicago and Milwaukee Client Bases

MILWAUKEE, WI (September 27, 2010) – Sterling Aviation, a leading business and private aviation company headquartered at Milwaukee’s Mitchell International Airport, has expanded its fleet with the addition of a second Raytheon Hawker 800XP executive jet. The new aircraft enhances Sterling’s ability to serve clients with non-stop service to virtually anywhere in North America, Central America and the Caribbean.

“Our business is growing rapidly, and our clients require more non-stop service options,” said Rob Gort, Sterling’s President and Chief Operating Officer. “Our fast-growing list of Chicago and Milwaukee clientele appreciate the added flexibility and availability offered by our expanding fleet.”

The Hawker 800XP has seating for eight passengers and features an all-digital Honeywell avionics suite, TCAS II and Terrain Awareness Warning System and redundant navigation for extended over-water operation. Interior appointments include club seats with leather upholstery and a three-seat divan. Other amenities include DVD/CD, flight phone, fully enclosed aft lavatory, forward galley with microwave and coffee warmer, and dual closets.

“We are delighted to add a second Hawker 800XP to our fleet of high quality jet and turboprop aircraft. The 800XP increases our non-stop capabilities throughout North America and the Caribbean for our Chicago air charter clients. We offer superior safety and service at prices lower than the national and regional charter programs,” said Roger Banaszak, Sterling’s Vice President of Marketing and Sales. “The Hawker 800XP provides a welcome extension to the extraordinary aircraft, first-class facilities, professional pilots, knowledgeable staff, and exceptional service that combine to form what we call The Sterling Experience.”

Sterling Aviation is a privately held, full-service aviation firm specializing in aircraft management, air charter, aircraft maintenance and aircraft acquisition, and is an FAA certified Part 145 Repair Station. Sterling’s Part 135 Air Carrier Certificate has nearly 30 years of accident-free operation

and is authorized for worldwide operations. The company is Gold Rated by ARG/US, and has recently been awarded registry to the coveted Air Safety Foundation (ACSF).
